

PhonePe Financial Analytics Dashboard Report

This report contains a complete analysis of the PhonePe Financial Analytics Dashboards created in Power BI. It includes Overview Dashboard, User Analysis Dashboard, and Transaction Analysis Dashboard with detailed KPI explanations, visual descriptions, and business insights.

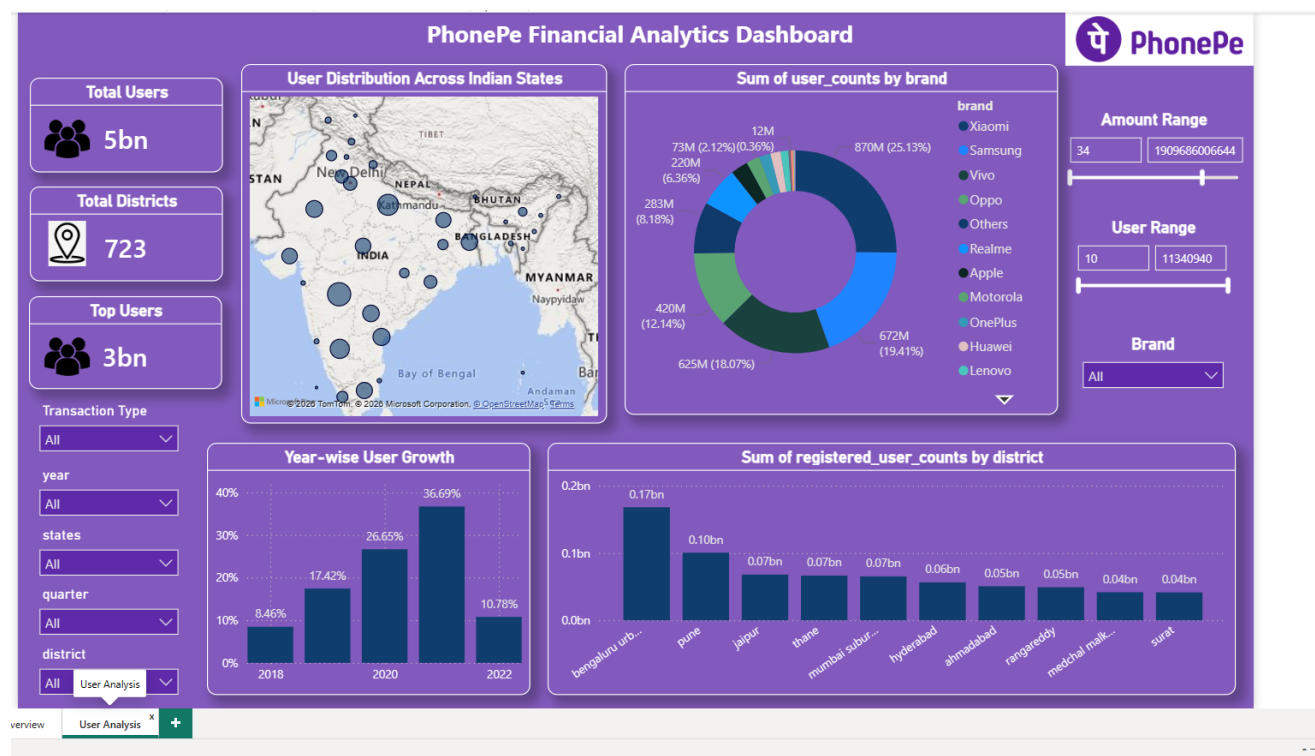

1. Overview Dashboard

The Overview Dashboard provides a summary of PhonePe transaction performance, transaction trends, user activity, and geographical transaction analysis.

KPI	Description
Total Amount	Shows the total transaction amount processed through PhonePe.
Transaction Count	Displays the total number of transactions.
Total Users	Represents total platform users.

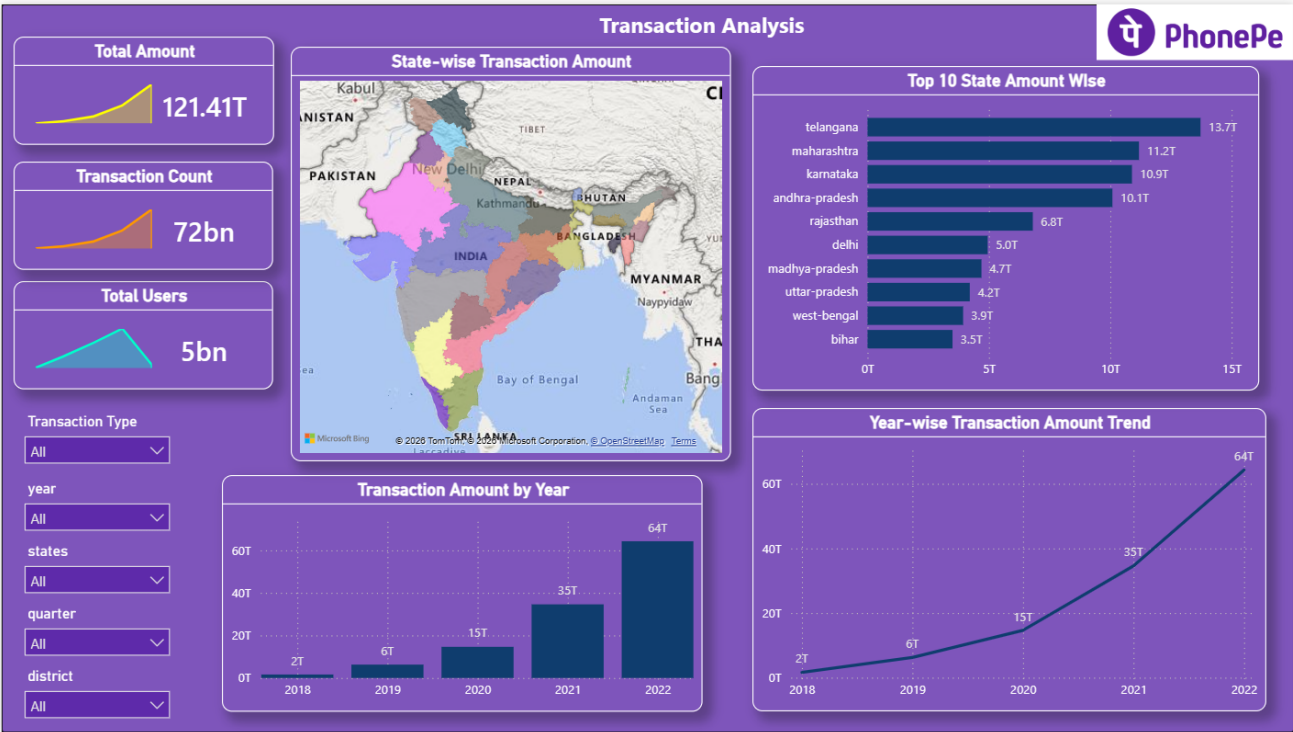

2. User Analysis Dashboard

The User Analysis Dashboard focuses on customer growth, user distribution, district-level analysis, and mobile brand usage among PhonePe users.

KPI	Description
Total Users	Displays the total number of users.
Total Districts	Shows the number of districts included in analysis.
Top Users	Represents the count of highly active users.

3. Transaction Analysis Dashboard

The Transaction Analysis Dashboard provides detailed insights into transaction amounts, yearly transaction growth, top-performing states, and state-wise transaction distribution. It helps businesses identify transaction trends and regional performance patterns.

KPI	Description
Total Amount	Displays the total transaction amount across all years.
Transaction Count	Shows the total number of transactions completed.
Total Users	Represents the total active users involved in transactions.

State-wise Transaction Amount

Map visualization showing transaction distribution across Indian states.

Top 10 State Amount Wise

Horizontal bar chart displaying top-performing states based on transaction amount.

Transaction Amount by Year

Bar chart showing yearly transaction growth from 2018 to 2022.

Year-wise Transaction Amount Trend

Line chart representing transaction growth trend over multiple years.

Interactive Filters

Allows filtering by transaction type, year, state, quarter, and district.

Key Insights

- Telangana recorded the highest transaction amount among all states.
- Transaction amount increased significantly from 2018 to 2022.
- 2022 showed the highest yearly transaction amount and growth trend.
- Interactive filters improve dashboard exploration and detailed analysis.
- The dashboard supports regional and yearly transaction performance analysis.

Overall, the PhonePe Financial Analytics Dashboard suite provides valuable insights into transactions, customer growth, and regional performance. These dashboards help organizations make data-driven decisions through interactive analytics and visual storytelling.
